Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restriction

1. Applicant's election with traverse of the portable unit or the species shown in Figures 1 through 3 in Paper No. 6 is acknowledged.

The traversal is on the ground(s) that different species are not per se shown in the Figures of the instant application as stated by the examiner in Paper No. 5.

This is found persuasive and the election/restriction requirement made in Paper No. 5 is hereby withdrawn and replaced by the following restriction requirement.

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 through 11, drawn to an integral temperature controlled compartment with heating and cooling capability in a vehicle, classified in class 165, subclass 202.
 - II. Claims 12 through 17, drawn to portable temperature controlled storage container with heating and cooling capability wherein heating or cooling is selected based on a sensed temperature, classified in class 165, subclass 254.

3. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination

Art Unit: 3743

as claimed does not require the particulars of the subcombination as claimed; for example, the combination that is Invention I as claimed, unlike the subcombination that is Invention II as claimed, does not require either an electrically operated micro compressor mounted on a storage container or a computer programmed with parameters including a high temperature limit and a low temperature limit defining a certain range of temperatures. The subcombination has separate utility such as in a mobile home or in a laboratory.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and because the search required for Group II is not required for Group I and vice versa, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ljiljana (Lil) V. Ciric, whose telephone number is (703) 308-3925.

While she works a flexible schedule that varies from day to day and from week to week, Examiner Ciric may generally be reached at the Office during the work week between the hours of 10 a.m. and 6 p.m. ET.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Henry Bennett, can be reached on (703) 308-0101. The fax phone number is (703) 305-3463.
